

Veterinary Ophthalmologist – Australia

Veterinary Ophthalmic Referrals

Background

An opportunity has arisen for a full or part-time veterinary ophthalmologist to join our relaxed, boutique, independent, stand-alone ophthalmology practice in Adelaide, Australia. One full-time and one visiting ECVO Diplomate and an ECVO/ANZCVS resident in training cover the current clinic caseload, backed up by a great team of support staff. We have excellent collegiate relationships with a multi-discipline referral and emergency centre minutes up the road, where other specialist small animal disciplines can be accessed, and a specialist equine practice in a neighbouring suburb, where we see our horse cases. The region's metropolitan and free-range zoos, together with local wildlife rescue groups, provide the basis of our exotic caseload.

Requirements

We are looking for an additional ophthalmologist for greater clinic caseload continuity and to help develop and hone the clinical services currently offered. Diplomate status of the ACVO or ECVO, Fellowship of the ANZCVS or successful completion of an ACVO, ECVO or ANZCVS approved residency is required.

Benefits

Adelaide is a compact, easy-living city, with affordable housing, great schools, world class universities, superb restaurants and plenty of recreational opportunities.

Great working conditions, an excellent base salary and production bonuses, together with buy-in/profit share business opportunities, make this a great package for someone looking for a career and lifestyle change. Sponsorship and relocation costs can be covered where applicable.

Applications

If interested or potentially interested, please contact me via email or phone (below) for more details.
